

Statement on California Proposition 65

June 2023

Under the California Safe Drinking Water and Toxic Enforcement Act of 1986 (known as Proposition 65 or “Prop 65”), the State of California creates and updates annually a list of chemicals known by the State of California to cause cancer or reproductive toxicity (“Prop 65 List”).

Prop 65 requires “clear and reasonable” warnings to be given if, in the course of doing business, a person knowingly and intentionally exposes an individual in California to a chemical on the Prop 65 List. Prop 65 also prohibits knowingly discharging or releasing a chemical on the Prop 65 List such that it is likely to, or will, enter any California drinking water source.

Ambiq’s semiconductor products and evaluation kits are not intended to expose any person to any chemical on the Prop 65 List during normal product use. Accordingly, the Prop 65 “clear and reasonable” warnings requirements do not apply to Ambiq semiconductor products and evaluation kits. As a result, Ambiq semiconductor products and evaluation kits do not include warnings specifically related to Prop 65 or the Prop 65 List chemicals. Ambiq does not make available a specific list of Prop 65 List chemicals that may be contained in our semiconductor products and evaluation kits.

Ambiq reviews our product content through chemical analysis, suppliers’ certifications, and full material content disclosures. Ambiq and our suppliers may consider certain information proprietary and unavailable for release. Ambiq also updates material content information as new requirements are identified. Based on this information, Ambiq has determined that, to the best of our knowledge, some Ambiq semiconductor products and evaluation kits contain one or more of the chemicals on the Prop 65 list. If present, these chemicals are not intended to be exposed to users, nor are they intended to be released or discharged during normal product use.

Yours truly,

A handwritten signature in black ink that reads 'Yvonne Chen'.
